## Experience

### Senior Product Desinger and Design Engineer
Gumroad (Antiwork)

January 2024 - February 2026 | Freelance | Remote

I specialized in **crafting user-centric features** and optimizing the overall user experience across various products, leveraging tools like V0, Cursor and Claude to rapidly bring ideas to life. I was also part of the team that published the **community Design System**.

### Freelance Product Designer

July 2021 - February 2026 | Freelance | Remote

Designed a **daylight calculator** for an architecture firm and collaborate with **BuidlGuidl Ethereum**, an open-source project focused on building products for the Web3 ecosystem.

### Product Designer, Gumroad (Antiwork)

July 2021 - November 2022 | Freelance | Remote

My main role was **crafting user-centric features** and optimizing the overall user experience for Gumroad.

### Product Designer, Beezy

June 2020 - August 2021 | Full-time | Remote

My role included **establishing a new Design System**, designing new features, optimising design workflows, managing Sketch to Figma migrations, creating animations, crafting branding proposals, and emphasising accessibility in design.

### Product Designer, Liferay

October 2019 - June 2020 | Full-time | Madrid, Spain

My responsibilities revolved around **enhancing the Lexicon Design System**: component design, icon creation, formulating design guidelines for patterns and components, and ensuring the Design System site remained consistently updated with documentation.

### Montessori Teacher, Manor Montessori Ltd
